Select which projector you would like to send your source to. You may choose to send different sources to each projector, or the same source to both.

Turn on the data projector:

- 1) When you have selected your media source, press the [Send to Projector] button. The projector will begin to warm-up, which will take about 60 seconds.

Adjust Volume:

- 1) Program volume will control **ALL** our source materials.
- 2) Microphone volume will control **ALL 4** wireless microphones for this room.

Laptop:

- 1) Connect either the VGA cable or the HDMI cable
- 2) Select the location you are connected to [Laptop 1] or [Laptop 2]
- 3) Select the Projector you would like your source viewed on [Projector 1] or [Projector 2]

Blu-ray, DVD or VHS tape:

- 1) Select the appropriate source [Blu-ray] or [DVD/VHS]
- 2) Use the controls to navigate the media as needed
- 3) Select the Projector you would like your source viewed on [Projector 1] or [Projector 2]

Document Camera:

- 1) The document camera is located above Instructor table 1 only
- 2) Use the controls to zoom and focus on your presentation material
- 3) Select the Projector you would like your source viewed on [Projector 1] or [Projector 2]

Wireless (Air Media & Apple TV):

- 1) Select the [Wireless Video] Button.
- 2) Choose either [AirMedia] for laptops and Android devices or [Apple TV] for iOS devices.
- 3) Follow the instructions on the touch panel for wireless connectivity.

Wireless Microphones:

- 1) There are 4 wireless lapel microphones for this room located in the equipment closet.
- 2) The power switch is located on the right side of the transmitter pack.
- 3) A **GREEN** light will appear when the microphone is on.
